EDUCATION

Gwinnett Technical College

Associate's in Cybersecurity

Lawrenceville, GA

Aug. 2021 – Dec. 2023

EXPERIENCE

IT Security Administrator (Freelance)

March 2023 – Present

Meshify

Austin, TX

- Streamlined user administration across multiple platforms while adhering to Role-Based Access Control (RBAC) standards. This initiative resulted in a notable reduction of \$4,000 in monthly operational costs.
- Contributed to achieving SOC 2 compliance by conducting audits of 97 vendors utilized by the organization, ensuring adherence to security standards and regulatory requirements.
- Orchestrated the integration of single sign-on (SSO) across 3 applications using Google Cloud Platform/Workspace, enhancing user authentication and access management efficiency.
- Configured and implemented 2 dynamic application security testing solutions within the CircleCI CI/CD pipeline, providing thorough black box testing of corporate websites and helping to develop strategies to remediate potential vulnerabilities and threats.

Cloud Analyst

Nov. 2022 – Present

MEDITECH

Canton, MA

- Deployed 5 cloud-native services and applications to support internal operations and customer-facing environments, catering to diverse business needs and enhancing overall service delivery.
- Automated the creation and management of over 117 firewall rules using Terraform, assuring seamless integration with existing infrastructure and enhancing network security measure.
- Provided troubleshooting support to address 20 network issues reported by customers, ensuring timely resolution and maintaining high levels of customer satisfaction.
- Leveraged OpenSSL to generate 15+ Certificate Signing Requests (CSRs) for X.509 certificates, and successfully installed certificates in the Windows Store Manager, securing public communication channels.

System and Support Analyst II (Contract)

Aug 2022 – Nov 2022

Mingledorffs

Peachtree Corners, GA

- Acted as the first line of defense in addressing 2 security incidents and assisted in analyzing dashboard data to help identify potential threats, contributing to the company's efforts in maintaining a secure environment.
- Administered Active Directory (AD) by creating a combined 50 users, groups and organizational units following least privilege, complying with security standards and reducing risk of unauthorized access.
- Provided Microsoft Exchange email support to 300 users, allowing seamless communication for users and troubleshooting any issues, maintaining uninterrupted email services.
- Utilized Mimecast to analyze and respond to 10+ alerts daily, effectively identifying and mitigating spam and phishing threats, thus bolstering enterprise security posture and protecting sensitive data.

IT Support Specialist

April 2022 – Aug 2022

Chicken Salad Chick

Atlanta, GA

- Implemented user account management in Azure AD(Microsoft Entra), providing access for 150 franchisees and company employees while enhancing security through the configuration of multi-factor authentication (MFA) to protect user accounts in the cloud environment.
- Conducted remote troubleshooting and diagnostics of switches, routers, and audio equipment located in the 20 store's network closet to promptly identify and resolve device issues, ensuring rapid restoration of network connectivity and uninterrupted operations for stores.
- Deployed static IP addressing configuration for 10+ devices via the firewall to ensure secure and reliable connectivity for franchise and corporate stores, enhancing network stability and operational security.

CERTIFICATIONS

CompTIA Security+ (Sec+) AWS Certified Cloud Practitioner (AWS CCP) Hashicorp Certified: Terraform Associate (003)

TECHNICAL SKILLS

CI/CD Platforms: CircleCI

Languages: Python, HTML/CSS,

Automation Tools: Terraform, Ansible

Developer Tools: Git, Postman, AWS, Azure, Docker, Google Cloud Platform, VS Code, Powershell, Bash

Security Tools: Datadog SIEM, Dastardly by Burpsuite, Sonarqube, OWASP Zed Attack Proxy (ZAP), Wireshark
