## EDUCATION

---

### Gwinnett Technical College

Associate's in Cybersecurity

Lawrenceville, GA

Aug. 2021 – Dec. 2023

## EXPERIENCE

---

### IT Security Administrator (Freelance)

Meshify

March 2023 – Present

Austin, TX

- Streamlined user administration across multiple platforms, ensuring adherence to Role-Based Access Control (RBAC) standards. This initiative resulted in a notable reduction of 4,000 dollars in monthly operational costs.
- Contributed to achieving SOC 2 compliance by conducting audits of 90+ vendors utilized by the organization, ensuring adherence to security standards and regulatory requirements.
- Orchestrated the integration of single sign-on (SSO) across 3 applications using Google Cloud Platform/Workspace, enhancing user authentication and access management efficiency.
- Configured and implemented 2 dynamic application security testing solutions within the CircleCI CI/CD pipeline, ensuring thorough black box testing of corporate websites and helping to develop strategies to remediate potential vulnerabilities and threats.

### Cloud Analyst

MEDITECH

Nov. 2022 – Present

Canton, MA

- Deployed 5+ cloud-native services and applications to support internal operations and customer-facing environments, catering to diverse business needs and enhancing overall service delivery.
- Automated the creation and management of 50+ firewall rules using Terraform, ensuring seamless integration with existing infrastructure and enhancing network security measure.
- Provided troubleshooting support to address 20+ network issues reported by customers, ensuring timely resolution and maintaining high levels of customer satisfaction.
- Utilized OpenSSL to generate 15+ Certificate Signing Requests (CSRs) for X.509 certificates, and successfully installed certificates in the Windows Store Manager, ensuring secure public communication channels.

### System and Support Analyst II (Contract)

Mingledorffs

Aug 2022 – Nov 2022

Peachtree Corners, GA

- Acted as the first line of defense in addressing 2 security incidents and assisted in analyzing dashboard data to help identify potential threats, contributing to the company's efforts in maintaining a secure environment.
- Administered Active Directory (AD) by creating a combined 50+ users, groups and organizational units following least privilege, ensuring compliance with security standards and reducing risk of unauthorized access.
- Provided Microsoft Exchange email support to 300+ users, by ensuring seamless communication for users and troubleshooting any issues to maintain uninterrupted email services.
- Utilized Mimecast to analyze and respond to 10+ alerts daily, effectively identifying and mitigating spam and phishing threats, thus bolstering enterprise security posture and protecting sensitive data.
- Improved security posture for 75+ endpoints by managing patch updates, assisting end-users, remotely installing software, and proactively pushing updates to enhance endpoint security.

### IT Support Specialist

Chicken Salad Chick

April 2022 – Aug 2022

Atlanta, GA

- Implemented user account management in Azure AD(Microsoft Entra), providing access for 150+ franchisees and company employees while enhancing security through the configuration of multi-factor authentication (MFA) to protect user accounts in the cloud environment.
- Conducted remote troubleshooting and diagnostics of switches, routers, and audio equipment located in the 20+ store's network closet to promptly identify and resolve device issues, ensuring rapid restoration of network connectivity and uninterrupted operations for stores.
- Implemented static IP addressing configuration for 10+ devices via the firewall to ensure secure and reliable connectivity for franchise and corporate stores, enhancing network stability and operational security.
- Assisted in managing the KnowBe4 platform and contributed to running the security awareness program for 100+ employees, ensuring effective cybersecurity training and resources, resulting in a improvement in employee awareness and compliance with security policies.

## CERTIFICATIONS

---

Comptia Security+

AWS Certified Cloud Practitioner (AWS CCP)

Hashicorp Certified: Terraform Associate (003)
