EDUCATION

Gwinnett Technical College Lawrenceville, GA
Associate's in Cybersecurity *Aug. 2021 – Dec. 2023*

EXPERIENCE

IT Security Adminstrator (Freelance) March 2023 – Present
Meshify *Austin, TX*

- Streamlined user administration across multiple platforms while adhering to Role-Based Access Control (RBAC) standards. This initiative resulted in a notable reduction of $4,000 in monthly operational costs.
- Contributed to achieving SOC 2 compliance by conducting audits of 97 vendors utilized by the organization, ensuring adherence to security standards and regulatory requirements.
- Orchestrated the integration of single sign-on (SSO) across 3 applications using Google Cloud Platform/Workspace, enhancing user authentication and access management efficiency.
- Configured and implemented 2 dynamic application security testing solutions within the CircleCI CI/CD pipeline, providing thorough black box testing of corporate websites and helping to develop strategies to remediate potential vulnerabilities and threats.

Cloud Analyst Nov. 2022 – Present
MEDITECH *Canton, MA*

- Deployed 5 cloud-native services and applications to support internal operations and customer-facing environments, catering to diverse business needs and enhancing overall service delivery.
- Automated the creation and management of over 60 firewall rules using Terraform, assuring seamless integration with existing infrastructure and enhancing network security measure.
- Provided troubleshooting support to address 20 network issues reported by customers, ensuring timely resolution and maintaining high levels of customer satisfaction.
- Utilized OpenSSL to generate 15+ Certificate Signing Requests (CSRs) for X.509 certificates, and successfully installed certificates in the Windows Store Manager, securing public communication channels.

System and Support Analyst II (Contract) Aug 2022 – Nov 2022
Mingledorffs *Peachtree Corners, GA*

- Acted as the first line of defense in addressing 2 security incidents and assisted in analyzing dashboard data to help identify potential threats, contributing to the company's efforts in maintaining a secure environment.
- Administered Active Directory (AD) by creating a combined 50 users, groups and organizational units following least privilege, complying with security standards and reducing risk of unauthorized access.
- Provided Microsoft Exchange email support to 300 users, allowing seamless communication for users and troubleshooting any issues, maintaining uninterrupted email services.
- Utilized Mimecast to analyze and respond to 10+ alerts daily, effectively identifying and mitigating spam and phishing threats, thus bolstering enterprise security posture and protecting sensitive data.
- Improved security posture for 75 endpoints by managing patch updates, assisting end-users, remotely installing software, and proactively pushing updates to enhance endpoint security.

IT Support Specialist April 2022 – Aug 2022
Chicken Salad Chick *Atlanta, GA*

- Implemented user account management in Azure AD(Microsoft Entra), providing access for 150 franchisees and company employees while enhancing security through the configuration of multi-factor authentication (MFA) to protect user accounts in the cloud environment.
- Conducted remote troubleshooting and diagnostics of switches, routers, and audio equipment located in the 20 store's network closet to promptly identify and resolve device issues, ensuring rapid restoration of network connectivity and uninterrupted operations for stores.
- Implemented static IP addressing configuration for 10+ devices via the firewall to ensure secure and reliable connectivity for franchise and corporate stores, enhancing network stability and operational security.
- Assisted in managing the KnowBe4 platform and contributed to running the security awareness program for over 100 employees, improving cybersecurity training and resources, resulting in a higher employee awareness and compliance with security policies.

CERTIFICATIONS

(2003) CompTIA Security+ (Sec+) AWS Certified Cloud Practioner (AWS CCP) Hashicorp Certified: Terraform Associate

Technical Skills

- **CI/CD Platforms**: CircleCI
  Languages: Python, HTML/CSS,
  Automation Tools: Terraform, Ansible
  Developer Tools: Git, Postman, AWS, Azure, Docker, Google Cloud Platform, VS Code, Powershell, Bash
  Security Tools: Datadog SIEM, Dastardly by Burpsuite, Sonarqube, OWASP Zed Attack Proxy (ZAP), Wireshark
